

# SUPPLIER EVALUATION BUSINESS ETHICS

## Objectives

Supplier analysis about the 10 global compact fundamental

Help you in your duties about your suppliers

Prevent you about the serious harms by your suppliers

Bridging respects the principles of the UN "Global Compact" in terms of human and labour rights, the environment and anti-corruption, and integrates them both internally and in the projects it is entrusted with.

## EVALUATION THEMATIC

### The Human Rights

Any organization must protect any risks of personal injury.

### Labour

Any organization must respect the labor fundamental rights.

### Environment

Any organization must respect the environmental fundamental in particular by the control of its pollution and waste.

### Anti-corruption

Any organization must conserve himself about any visible elements of corruption.

## BUSINESS ETHICS

### Human Rights

What about the Working conditions ? ( cleanliness, salubrity, luminosity, living area, toilets,... )

Are there any risks of personal injury ?

Does the supplier work in a polluted environment that can cause serious pathologies ?

### International labour standards

Are there any situations of working children ?

Is there any evidence or strong suspicion of forced labor ?

### Environment

Does the supplier use highly polluting products that clearly have a profound impact on air, water or soil ?

Does the supplier generates dangerous wastes without storage management ?

### Fight against corruption

Are there any visible elements of corruption ?
